

Etsy API-

<https://developers.etsy.com/documentation/>

<https://developers.etsy.com/documentation/tutorials/quickstart>

Important info-

Rate limit- 10,000 queries per 24 hrs, 10 queries per second. For the purposes of this project, we won't get close to that.

Requires Node.js to be installed to work

We will need to register our Etsy application <https://www.etsy.com/developers/register>

We will create our landing page for drivers

We can use postman to help visualize API calls
